

Data Dictionary: Maddison Dataset

Summary

`maddison_indicators.csv` is a historical reconstruction of GDP, GDP per capita and population for 15 countries from 1900 to 2022, stored in long format (one row per country, indicator and year) in the staging table `aid_staging.stg_maddison`.

Item	Value
Rows	4,349
Columns	6
Entities	15 countries (no EU aggregate)
Indicators	3 (gdppc, gdp, pop)
Year span	1900-2022 (123 years)
NULL values	0
Duplicate keys	0

Columns

The primary key is (country_iso3, indicator_code, year).

Column	Type	Description
country_iso3	CHAR(3)	ISO 3166-1 alpha-3 country code
country_name	VARCHAR(20)	Country name (max. 9 characters)
indicator_code	VARCHAR(10)	Short indicator code
indicator_name	VARCHAR(50)	Indicator description (max. 37 characters)
year	SMALLINT	Observation year
value	DOUBLE	Indicator value; the unit depends on the indicator

Indicators and units

All monetary values are in constant 2011 international dollars (PPP), so they can be compared across countries and years.

Code	Indicator	Unit	Rows	Countries	Years	Min	Max	Target in DW
gdppc	GDP per capita	GDP per capita (2011 international \$)	1,461	15	1900–2022	853.2	60257.1	FACT_ECONOMY.gdp_per_capita
gdp	GDP	GDP (2011 international \$)	1,444	15	1900–2022	75441600000	3909612753939	FACT_ECONOMY.gdp
pop	Population (mid-year)	Population (thousands)	1,444	15	1900–2022	1311.9	8381.3	FACT_SOCIETY.population

Coverage by country

Only 7 of the 15 countries have all 123 years; missing data appears as absent rows, never as NULL values. Coverage is described by country because all three indicators share the same gaps (except Romania).

Country	ISO3	First year	Last year	Years (gdppc)	Gaps inside the span
Belgium	BEL	1900	2022	123	none
Czechia	CZE	1970	2022	53	none; no data before 1970
Germany	DEU	1900	2022	123	none
Spain	ESP	1900	2022	123	none
Estonia	EST	1973	2022	44	1974–1979
France	FRA	1900	2022	123	none
Greece	GRC	1900	2022	123	none
Hungary	HUN	1900	2022	100	1901–09, 1911–12, 1914–19, 1921–23, 1943–45
Ireland	IRL	1913	2022	103	1914–1920
Italy	ITA	1900	2022	123	none
Lithuania	LTU	1973	2022	44	1974–1979
Latvia	LVA	1973	2022	44	1974–1979
Poland	POL	1900	2022	89	1901–09, 1911–12, 1914–19, 1921–28, 1939–47
Portugal	PRT	1900	2022	123	none
Romania	ROU	1900	2022	123	none for gdppc; gdp and pop missing 1901–1919
European Union	EUU	–	–	0	not in this source

Additional info

- **Sparse early years.** Before 1930, Hungary and Poland have only benchmark years (1900, 1910, 1913, 1920), with further gaps around World War II.
- **Late starts.** Countries that were part of Czechoslovakia or the USSR start in 1970 (Czechia) or 1973 (Estonia, Latvia, Lithuania).
- **Romania mismatch.** GDP per capita exists for 1901–1919 but GDP and population do not, which is why gdppc has 17 more rows than gdp and pop.
- **No EU aggregate.** EUU appears in WDI and the events file but not here, so its gdp_per_capita, gdp and population stay empty in the warehouse.
- **Different units from WDI.** Constant 2011 PPP dollars are not directly comparable with WDI's GNI per capita in current US\$. Maddison ends in 2022, WDI in 2025.
